

DAF Genuine Bull Bars

Maximising safety – protecting your investment

For DAF – vehicle and road safety is a priority. The DAF truck model range come with a comprehensive suite of passive and active systems that provide the highest levels of safety for drivers and other road users.

DAF Genuine Parts meet the strictest requirements for safety, reliability and performance – DAF Genuine Bull Bars have been engineered to seamlessly integrate with the DAF Euro 6 XF & CF model range. They are compatible with all existing DAF safety systems, including the Advanced Emergency Braking System (AEBS) and driver's air bag and seat belt pretensioners. Correctly installed to PACCAR Specifications, DAF Genuine Bull Bars meet front underrun protection ADR 84 and lighting ADR 13.

MADE FOR DAF

- Integrated design for the DAF Euro 6 XF & CF.
- Driver's air bag, seat belt pretensioner, AEBS and Original Equipment (OE) tow point compatible.
- Designed, engineered and manufactured in Australia.
- Fully ADR compliant.

DAF Genuine Bull Bars

PRODUCT INFORMATION

Front protection is critical for ensuring vehicle uptime and maximising your return on investment. DAF Genuine Bull Bars are designed to provide superior vehicle protection while complementing DAF Euro 6 styling and safety. Optimal connection to the vehicle has been developed, integrating directly into the OE DAF front underrun protection (FUP) device.

The bottom hinged pivot mount means the bar can easily be lowered for access behind it or tilting the cab.

In the event the vehicle needs to be towed, adapters are included to allow full use of the OE tow points, meaning no removal of the bar is needed. The adapters can easily be stored in the vehicle toolbox.

In-built headlight guards provide enhanced protection against animal strikes while maintaining full lighting output, and optional auxiliary light grilles are also included in the kit.

A vehicle tie-down tow hitch is integrated into the bumper, which can be covered using the DAF stainless number plate surround included in the kit.

CF LOW BULL BAR

The low profile CF bull bar is the ideal metro bull bar solution, protecting vital components, while maintaining full access to the vehicle maintenance panel for daily checks.

Weight: 113kg Forward projection: 209mm (with eye bolts)

XF HIGH BULL BAR

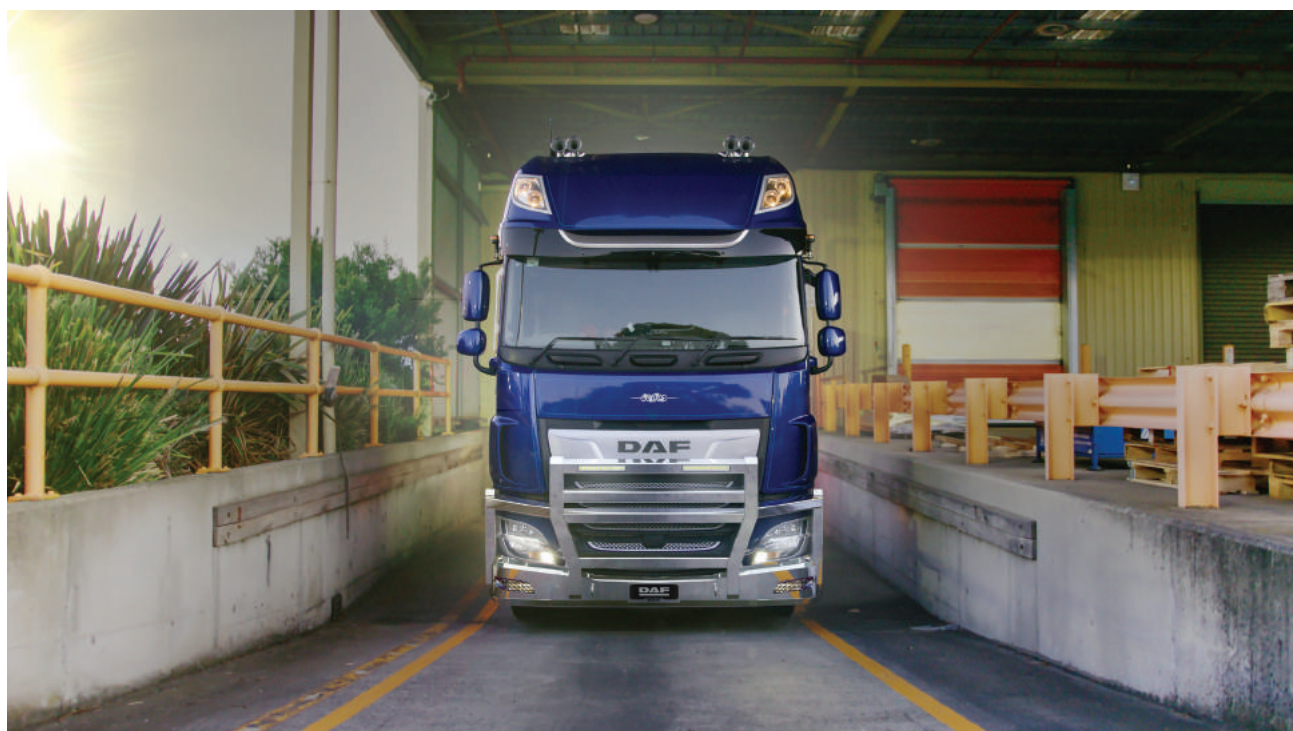

The XF bull bar utilises a full height design, heavy duty construction and in-built LED light bars to provide added protection and safety, especially in interstate and road train applications.

Weight: 141kg Forward projection: 209mm (with eye bolts)
