DISC BRAKE PADS

PACCAR Genuine Brake Pads feature M520 friction material and are tested to meet FMVSS 121 Standard.

FVMSS 121 is an industry recognised standard and tests the friction material to ensure braking performance under normal and emergency conditions.

All PACCAR Genuine Brake Pads come with fitting kits and are manufactured to the highest standards in a TS-16949 accredited, OEM facility.

- **Tested to Meet FMVSS 121 Standards**
- **12 Month Warranty**
- **Manufactured to OEM Quality & Standards**

GENUINE PARTS

KEEP IT GENUINE

Demand for Air Disc Brakes (ADB) on heady duty, class 8 applications has been growing steadily and is projected to represent more than a third of brake production in 2019. Demand will continue to grow for ABD over the next 10 years and is forecasted that by 2029, 80% of all heavy duty trucks will use ADB

To ensure you get the best out of your ADB system, always replace your disc pads with the genuine, first fit option.

The PACCAR Genuine ABD has been developed to work as one complete system. Using aftermarket equivalents can potentially degrade the braking performance, leading to premature wear and higher maintenance costs.

So when you need to replace your brake pads, look for the blue box and insist on PACCAR Genuine.
